Experience

- 05/2021-NOW **Learn For Cause** - **Developer**
Working as a Developer in the IT department. I also mentored a group which was working on a MERN project named Blogger Web.
- 05/2021-05/2021 **Skill Safari** - **Web Development Intern**
Learnt a lot about full stack development. Worked on few basic projects using MERN stack.
- 01/2021 - 02/2021 **The Sparks Foundation** - **Web Development Intern**
This internship involved creating a dynamic banking website which is linked to a database and hosting it including Payment Gateway Integration using Paytm.
- 02/2020 - 03/2020 **Central Tool Room Training Center** - **AI ML Internship**
Vocational training was on AI models, Computer vision, Machine learning etc. The project was to create a face recognition model which can recognize the face of a person and display the name.

Achievements

Proptech Hackathon - HackerEarth Finalist
TechGig Code Gladiators Semifinalist (Rank 280)
Open Source Contributor at GirlScript Summer of Code (Top 100)
HackOn Hackathon 2.0 participant (Top 50)
MIC Innovation Challenge Participant
Regional Science Congress – BHOPAL Region Participant
National level Badminton player
5* Coder at HackerRank in C++, Python and Problem Solving
3* Coder at LeetCode || 3* Coder at CodeChef

Side Project

- Simple Yet Smart** **Value addition in Indian middle-class properties**
It is a team project for proptech Hackathon. It mainly aims at addition of value to properties. It includes building strong security system, automatic sanitization, hygienic environment, use of smart appliances and convertible appliance.
- Typing Speed Test** **An application to test typing speed**
An application was designed that will test your typing skills and show you your speed, accuracy, WPM A python based application and a website was made with similar functions.
- Chandan Tutorials** **A simple website for a home tutor**
This is a project to design the official website of a private organization which provides private tutors to registering students. It includes several features such as login/ signup.
- Hawk-Eye** **A smart lens cum Helmet**
It is a team project for MIC Innovation Challenge which is based on building a smart lens-cum helmet for the soldiers and other officials working in the defense organizations. The idea is to enable the soldiers to communicate visually during the special combats that would increase their efficiency and reduce the number of fatalities.
- Temperature Sensor** **with alert systems**
A temperature alert system by the use of buzzer, light and sending message to mobile was made. It would be lot helpful in storage of various things at certain range of temperature.
